POSTER BULLETIN No. 7

North Carolina State College of Agriculture and Engineering, North Carolina Department of Agriculture, North Carolina Experiment Station, and United States Department of Agriculture, Cooperating

AGRICULTURAL EXTENSION SERVICE

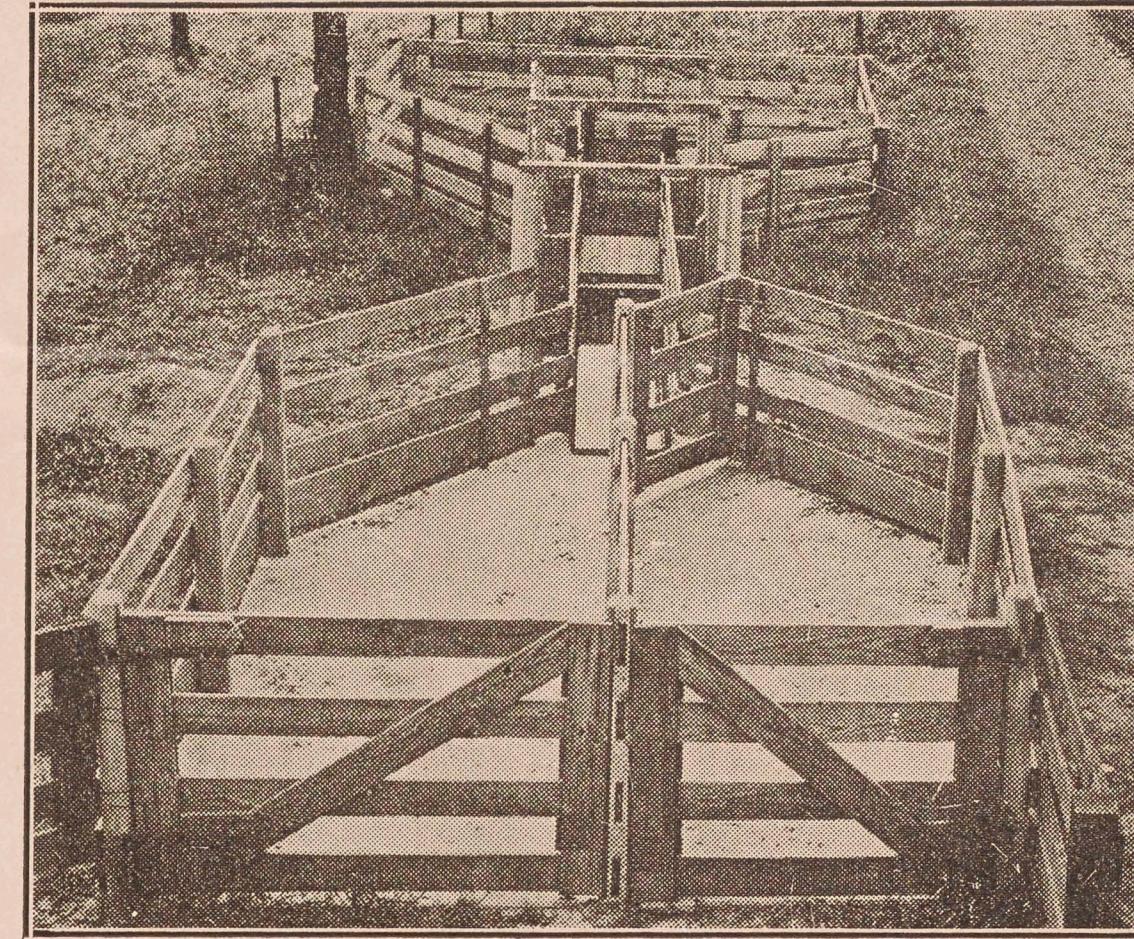

B. W. KILGORE, Director, Raleigh and West Raleigh

Grow More Sheep and Wool

Sheep Should be Slaughtered Quickly Under Clean Surroundings

Sheep will both feed and clothe the farmer. They destroy noxious weeds and improve the fertility of the farm. They bring returns in the Spring of the year. They make use of otherwise idle land.

A Dipping Vat will Destroy Lice, Ticks, and Improve the Quality of the Wool

Available Publications on Sheep Raising

Washington, D. C.

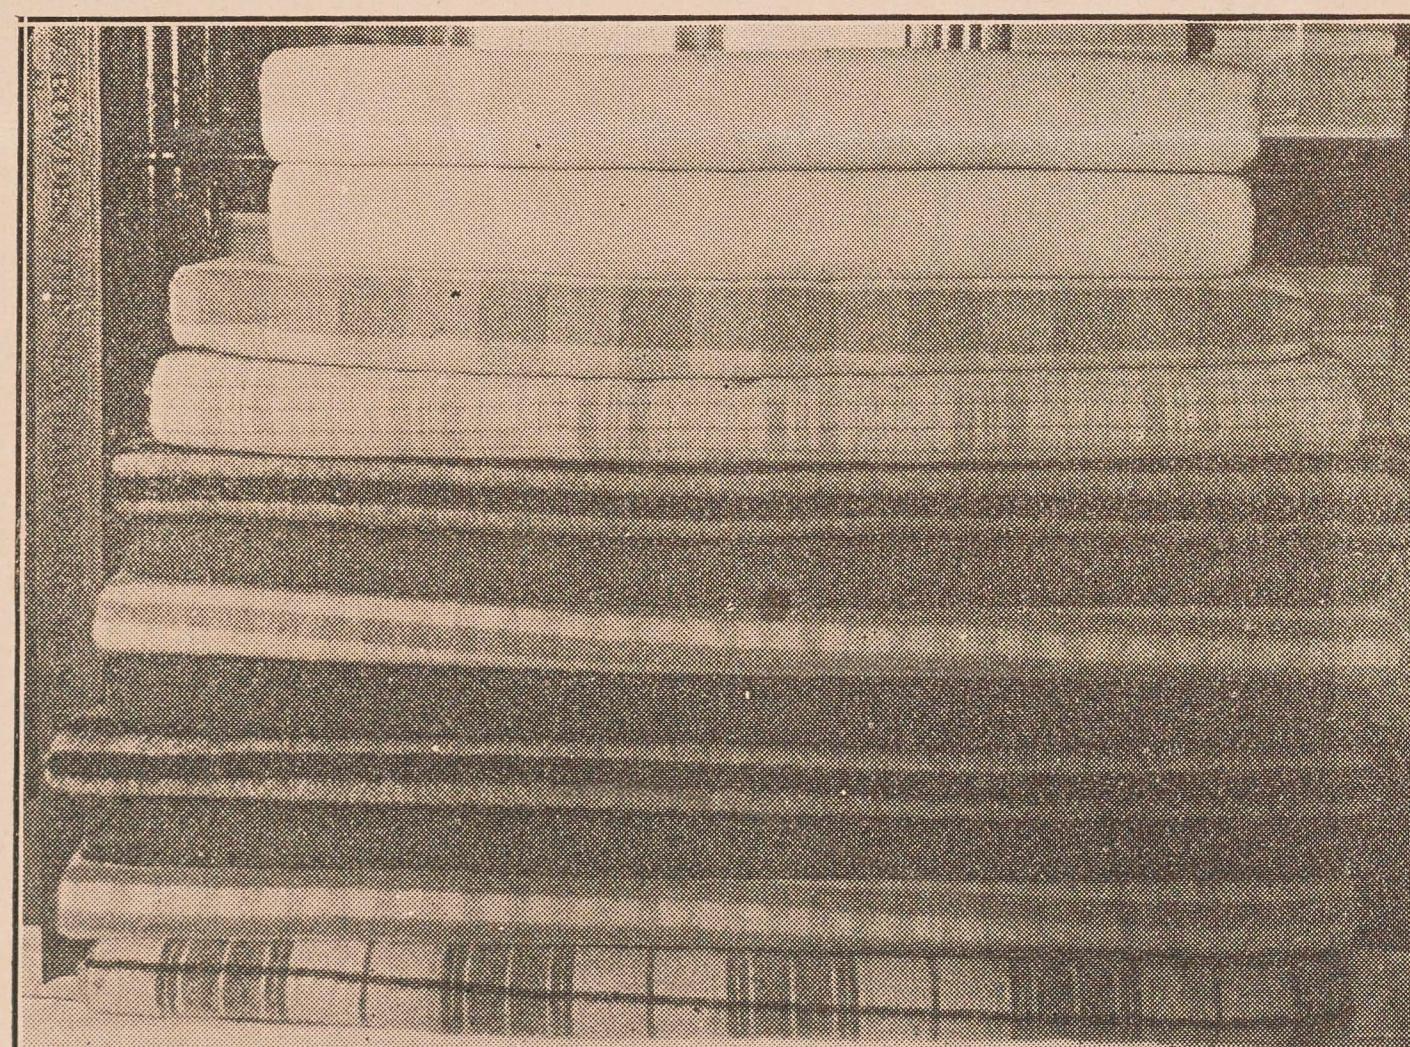

Farmer's Bulletin No. 576—Breeds of Sheep for the Farm.

Farmer's Bulletin No. 652—The Sheep-Killing Dog.

Farmer's Bulletin No. 810—Equipment for Farm Sheep Raising.

Farmer's Bulletin No. 840—Farm Sheep Raising for Beginners.

Farmer's Bulletin No. 573—The Angora Goat.

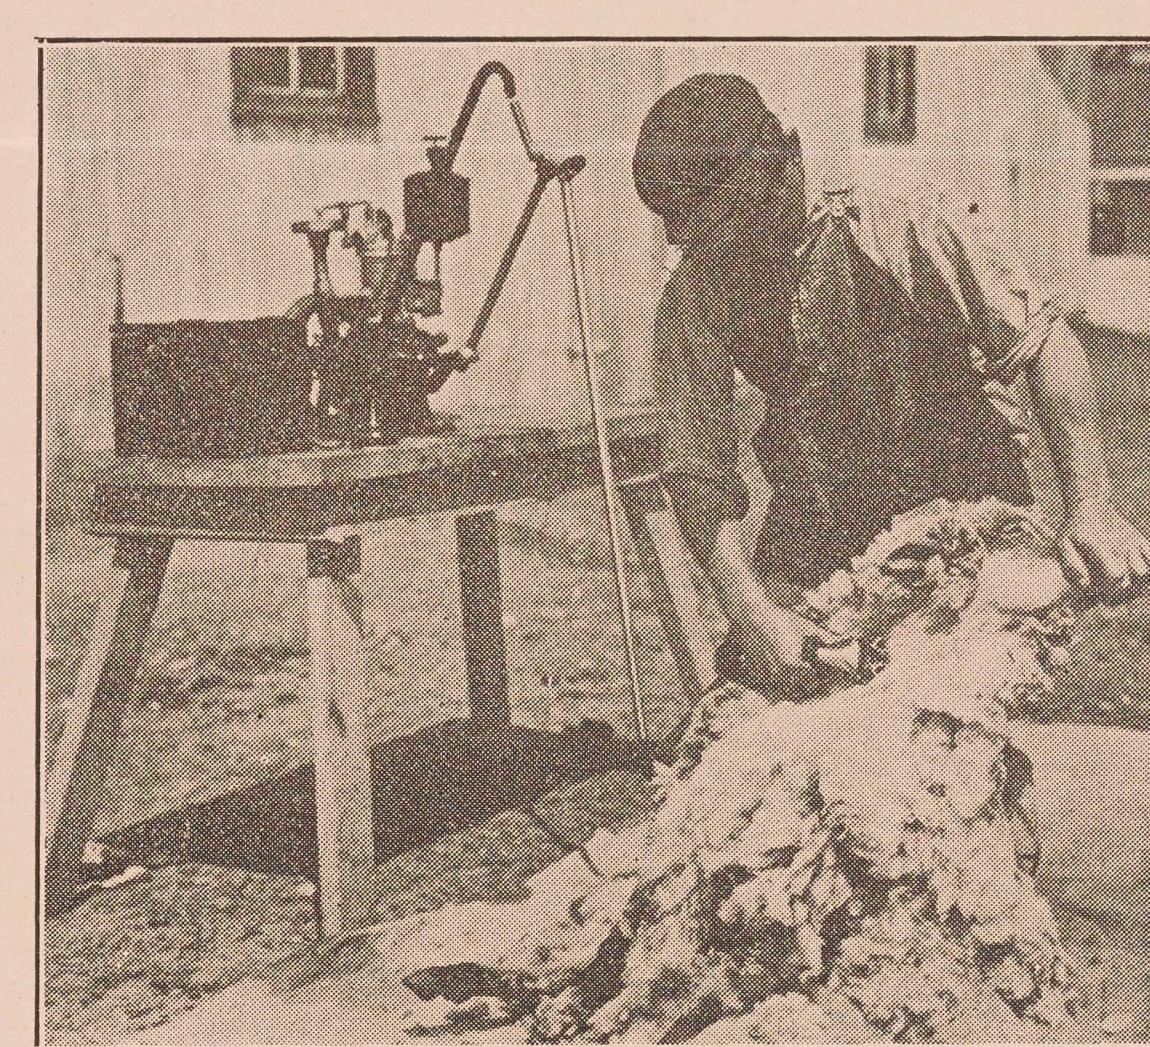

These Bed Blankets and Thirteen More were Made from One Small Flock of Sheep Yielding 312 Pounds of Unwashed Wool. The Blankets were Worth \$162.15.

Breed Ewes in July and August.

Lambs should come in early part of year. They thus avoid hot weather and stomach worms, and lambs finished early always bring higher prices.

Wool should be sold by a competent wool merchant after it has been properly graded.

The Wool on Every Sheep will Make a Pair of Double Bed Blankets. Shear Sheep in April and May. Tie Fleeces with Paper or Wool Twine. Remove all Manure and Tags.
